

Catamaran C47

(+) Specifications :

LOA: 46,6 ft

Beam: 25,2 ft

Power: 2x21 KW

Displacement: 9 t

Category: A

Draught: 1.64 ft

Fuel capacity: 200l

Cabin: 8 berths

(+) Description :

Made for the voyage whether for a trans-oceanic in the long-distance trip or coastal cabotage with family and friends (advanced ergonomoy, automatic / manual doubled maneuver systems, tracking embedded systems and navigation).

All the comfort on board to tackle smoothly sailing. Bathroom with shower, double berth, heating, air conditioning, fridge / freezer, desalination, equipped kitchen area, connectivity on board.

A great energy self-sufficiency, characteristic of the new generations of multihull sailboats, the more you navigate the more you are self-sufficient thanks to energy recovery by hydrogenerators integrated with the electric propulsion system.

A monolithic wood composite base structure for uncompromising solidity, reliability and durability.

An optimized hydrodynamic makes it quick and efficient to be quickly safe from a changing climate.

The Design targeting a low environmental impact (structural elements, main electric propulsion or hybrid backup, hydropower, ...) with a high level of recyclability thanks to its natural composite materials, biosourced.

Helped with integrated smart navigation assistants who increase safety on board (state of the structure, embedded systems, control of the immediate environment, connectivity ...)

Centralized and connected maintenance system.
